

| **allocacoc** |  
a different standard.

# allocacoc

# Introduction

“ Doing different is the only ”  
way to make a difference

## Who we are

Allocacoc is a one-of-a-kind industrial design company that is not limited to any category or current industry.

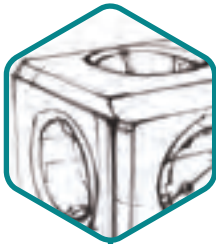

## Vision

To be a company that inspires you with products of a different standard.

## Mission

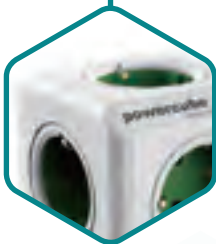

Our mission is to improve the design and value of existing products that provide a **new user experience**, and make them **accessible** to every household in the **world**.

## How we work

### Design

With only a nice shape we will not be able to create a change. This is why functionality is important. Our products should offer a solution to a problem that current products on the market do not address.

### Production

We pay close attention to the cost: It needs to be affordable for the end user to buy the product. Only when these two criteria are met will it be worthwhile for the end user to adapt to the different standard.

### Sales

Our products should also be widely available: from the largest hypermarket to the smallest neighbourhood convenience store. This means that we need a well defined distribution model, with a clear role and value for every link in the distribution chain.

## Awards

Our vision helps us to create innovative solutions with value to current daily problems and to achieve recognition on multiple platforms.

iF Design Award

Red Dot Design award

Shell Livewire award  
Design award

CEDIA Winner award

Moscow Gift award

GIO award

MKB Innovation award

CITE award

Innovation award

Energy award

Computex d&i award

# PowerCube | Extended |

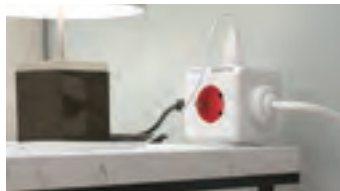

Always within reach

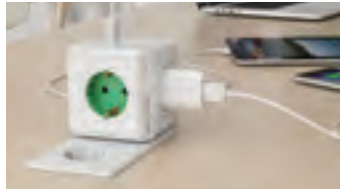

## Mount. Twist. Charge

Tape your dock to any smooth surface. Twist and lock your PowerCube to the dock. Turn your mounted PowerCube a full 360 degrees to plug in at any corner. Perfectly suited for reachable access to charging all your devices.

## Power Within Reach

Struggling to charge your phone because the power outlet is across the room? Or maybe your wall outlet is hidden behind your desk or bed? Whether you need outlets near your bedside or desk, the PowerCube |Extended| is a perfect choice. This durable cable provides power across the room. You need power? We got you!

## No Plug Blockage

Are those bulky laptop plugs getting in the way of the other power outlets? The PowerCube |Extended| is perfectly suited to neatly plug in all your devices.

## Dual-USB Charging

The PowerCube |Extended USB| comes with dual powered USB-A ports (2.1A) that are compatible with your smartphones and tablets. No additional adapter needed.

## Stack to personalize it

Stack your PowerCubes to create your desired amount of sockets. Just stack, plug, and power! Have fun creating your own tailored source of power.

## Childproof Sockets

Spring-loaded receptacle cover plates prevent the insertion of objects when unequal pressure is applied. Align the prongs to plug into the sockets. Keep your child safe with our childproof sockets.
